

EnCircle Automation 2009

Business Automation Simplified

Encircle Automation 2009

By Lytecube Technologies [www.lytecube.com]

The no nonsense business automation solution. Works out of the box, needs no configuration or administration. Lightweight and simple to use, the perfect answer for most small businesses and startups.

Why Encircle?

The answer in one word is simplicity. If you are a small business or startup your automation solution is the last thing you want in your way. EnCircle is so simple to install and operate that you can get started on day one. EnCircle contains an self configuring embedded database, you will never have to configure anything.

Centralized Contacts Repository

EnCircle's *Contacts Manager* provides a centralized repository of customer and vendor information that can be accessed from anywhere. Never lose an important contact from anybody

Better Customer Relationships

Build stronger relationships, track your customer interaction with *ActivityTracker*. A simple to use CRM tool for tracking all forms of communication. Keep tabs on support calls and case histories using *CaseWalk*. Never worry about who said what and where.

Improve Productivity

ProjectTracker gives you a birds eye view of every project going on in your company. You can drill down to individual tasks and assigned owners, never worry about whos doing what. Figure out schedule slips before it hits you.

Leads & Opportunities

Never miss a sales opportunity, track your sales leads from start to closure. Get complete reports on revenue size, projections and lead pipelines. One simple tool *Opportunities*.
